

## Approach to the Digital Society

### T-Station lite Ver.2.0 **Option**

It contributes to the improvement of production efficiency, operation rates, and quality in the production field.

#### Machine model

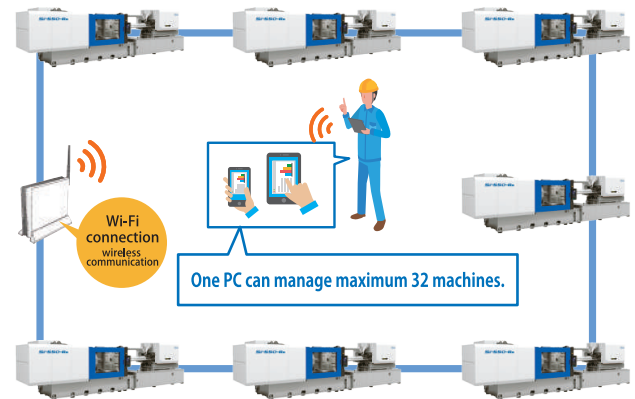

#### Integrated management of multiple machines

- ◎ Operation management
- ◎ Condition management
- ◎ Remote diagnosis
- ◎ Quality management
- ◎ Screen management

<b>Global support</b>	English, Chinese (simplified, traditional), Korean, Japanese
<b>E-mail transmission function</b>	Automatic transmission of machine malfunctions via e-mail
<b>Graph display function</b>	Output "Injection position and time" graph per cycle to PC
<b>Data external output function</b>	Output molding conditions to PC

### T-Remote Web **Option**

You can remotely operate the machine's screen.

#### What can be done through tablet remote control

- ◎ Viewing monitor information and changing conditions are possible on the counter-operator side.
- ◎ Capture and save screen shots.
- ◎ A single tablet can connect to 32 machines simultaneously

#### You can carry the screen with you

- ◎ Condition setting referring to the conditions of other machines.
- ◎ Changing molding conditions while viewing products and peripheral equipment on the opposite control side.
- ◎ Performing I/O checks during maintenance while observing operations.

**No need to install apps on the tablet.**  
 Screen operation is also possible on Android, iPad and iPhone.
